

Magnetic Fields is an eclectic collection of 50 dark and troublesome noisescapes. The idea behind the sounds is one of dusty, mechanical, hyperreal atmospherics. Glimpses into little worlds that may or may not exist.

The sounds were constructed with a variety of The Unfinished's homegrown samples, which were then processed with a variety of NI Reaktor modules. Field recordings, vocals and drumloops have all been given the Magnetic Fields treatment, providing a cool collection of curiosities ideal for ambient, sci-fi and horror work.

The Unfinished is a composer, sound designer and producer based in London. He has worked on a variety of projects including Hollywood movies, hit US TV shows and AAA video games.

Contents

50 stereo WAV files (24-bit, 48k)

9 NKI patches / 1 SFZ patch

302 MB of audio material
